-
-

Tool Ratings

 *Trello* Trello(project tracker)

Rating: 2

Not that helpful

 Discord(Communication platform)

Rating:5

Super easy to use

 GitHub(VCS repository)

Rating: 5

Super easy to use

PostgreSQL(database)

Rating: 5

Super easy to setup and use

heroku

Heroku(Deployment environment)

Rating: 3

Had a lot of trouble getting
our website to run on it.

Challenges

- The person who came up with the project idea dropped the class without telling us.
- Setting up a node.js server
- Sending and receiving information with a node.js server
- Calling and receiving information from a node.js server
- Making calls to a database with node.js
- Setting up a project on heroku

What We Learned

- How to make a working frontend
 - How to make a working backend
 - How to connect them together
 - How to use a database to store information
 - How to work as a team
-
-

Project Management Methods

- Pair Programming
 - Peer Code Reviews
 - Iterative
-
